**Product:** Sling Range

**Current Product Part Number:** Various

**Replacement Part Number:** Various

## SALES BULLETIN

From January 2014, the company will be making a number of changes to the current sling range which will include the discontinuation of the majority of the current sling range, and the introduction of a new updated range featuring improved design features and additional size and fabric options.

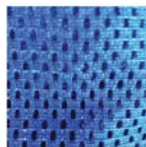

Four fabric options will be available;

**Standard polyester**

A hardwearing close weave fabric. Providing a comfortable smooth finish.

Safe working load: 400kg

**Royal Net**

Ideal for bathing, the Royal Net material has thousands of tiny drainage holes.

Safe working load: 300kg

**Parachute**

Silky, soft material which is light and provides little friction during application/removal of the sling.

Safe working load: 200kg

**Spacer**

State of the art material which adapts to the shape of the users body. Used in in-situ slings the fabric offers pressure relief, heat dispersion and moisture wicking properties.

Safe working load: 300kg

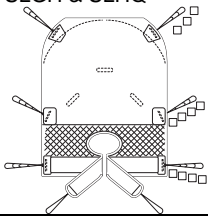

The new range offers several benefits over the replaced models including;

- Better fit, each sling has been carefully shaped around the head, pelvis and legs.
- Quilting has been reduced to the leg sections only and no longer extends upto the lower back.
- Slide sheet material has been added to the rear of the leg section to aid fitting.
- A rear centre pocket has been added to assist with fitting.
- Parachute slings no longer include a polyester inner.
- There are options for alternative colours and cartoon paediatric patterns.
- Options for simulated sheepskin, terry toweling and polar fleece linings.
- Additional models have been added including an in-situ sling, a toileting sling complete with head support and a range of stand aids, handling belts and slide sheets.
- Special slings will once again be available and can be manufactured within 15 working days.
- Slings can be manufactured to have clip attachments in place of traditional sling loops

The majority of the existing range will be discontinued once stock has been exhausted. Our most popular slings and those supplied under contract will be gradually phased out over a six month period.

Details of the new range can be seen overleaf...../

The existing range of slings will be replaced, as indicated in the table below, and various new ranges will be introduced.

Part number & Fabric Options	New Model	Existing Model Equivalent	Sizes
